## PROFESSIONAL EXPERIENCE

### **Kootenai Health – Patient Equipment Transporter**

10/2018 - Present

Responsible for safely transporting patients and equipment throughout all departments of the hospital. Trained on proper lift assist techniques and equipment needed to support the patient's safe transfer. Keeping up on supplying each department with the equipment needed. BLS and MOAB certified. Helping to keep myself as well as my peers accountable for constant and excellent patient care at all times.

### **Seattle Coffee Gear - Repair Technician**

04/2016 – 05/2017

Worked with a team to ensure quality and efficient repairs of home espresso equipment. Trained and developed team members and assisted in another department's education. Coordinated with other departments to ensure an excellent customer experience. Worked trade shows and helped with setup and teardown. Maintained quick turn-around times and daily repair of home and commercial machines and coordination of commercial installations.

### **Slayer Espresso - Production Technician**

05/2015 - 04/2016

Represented Slayer and helped with sales and marketing at trade shows. Completed sub-assembly and assembly of commercial espresso machines at a production level. Wired 120, 240 and 3-phase machines and modified testing procedures. Built to order and assembled by hand, working with local craftsmen to design and create a machine truly remarkable and unmatched in the industry.

### **Seattle Coffee Gear - Service Advisor / Technician**

02/2013 - 05/2015

Helped build sales and customer relations on the showroom floor by listening and evaluating customer needs and by product demonstration. Represented the company with sales and technical support at trade shows. Assisted in training all sales associates on the machines and how each one would best suit the needs of our customers. Service Writing and preparing orders for repairs.

### **Creative Metal Products - Machinist**

06/2012 - 12/2012

Measured and marked dimensions and reference points to extreme tolerances. Calculated controls to regulate machining factors such as part speed, feed, coolant flow, depth and angle of cut. Machined small parts to tolerances of 0.0050 of an inch or less. Operated laser marking, CNC and manual milling machines.

## EDUCATION

Working towards a **Bachelor of Science** degree 2017-present • North Idaho College, Coeur d'Alene, Idaho
